Proteins

Mechanism of oxyhaemoglobin breakdown on reaction with acetylphenylhydrazine.
By J. K. French, C. C. Winterbourn & R. W. Carrell 19

Physical and chemical properties of human plasma α_2-macroglobulin.
By P. K. Hall & R. C. Roberts 27

Thermodynamics for the interaction of ε-dinitrophenyl-L-lysine and bovine colostral anti-dinitrophenyl immunoglobulin G2.
By T. K. S. Mukkur 39

The amino acid sequence of the tryptic peptides from actinidin, a proteolytic enzyme from the fruit of *Actinidia chinensis*.
By A. Carne & C. H. Moore 73

Characterization of proteins structurally related to human *N*-acetyl-β-D-glucosaminidase.
By M. Carroll 191

The similarity of the two high-molecular-weight polypeptides of erythrocyte spectrin.
By M. J. Dunn, R. B. Kemp & A. H. Maddy 197

Structural studies of wheat monomeric and dimeric protein inhibitors of α-amylase.
By T. Petrucci, G. Sannia, R. Parlamenti & V. Silano 229

Gel filtration of sialoglycoproteins.
By J. A. Alhadeff 315

Primary structure of the major β-chain of rat haemoglobins.
By L. M. Garrick, R. L. Sloan, T. W. Ryan, T. J. Klonowski & M. D. Garrick 321

Nucleic Acids

Bifunctional intercalation and sequence specificity in the binding of quinomycin and triostin antibiotics to deoxyribonucleic acid.
By J. S. Lee & M. J. Waring 115

Interaction between synthetic analogues of quinoxaline antibiotics and nucleic acids. Changes in mechanism and specificity related to structural alterations.
By J. S. Lee & M. J. Waring 129

PAGE

A defined molecular-weight distribution of deoxyribonucleic acid after extensive sonication.
By A. W. Davis & D. R. Phillips 179

Involvement of deoxyribonucleic acid polymerase B in nuclear deoxyribonucleic acid synthesis.
By T. R. Butt, W. M. Wood, E. L. McKay & R. L. P. Adams 309

Carbohydrates

Periodate oxidation and the shapes of glycosaminoglycuronans in solution.
By J. E. Scott & M. J. Tigwell 103

Characterization of proteoglycan and the proteoglycan–hyaluronic acid complex by electric birefringence.
By M. Isles, A. R. Foweraker, B. R. Jennings, T. Hardingham & H. Muir 237

Blood-group-Ii-active gangliosides of human erythrocyte membranes.
By T. Feizi, R. A. Childs, S.-I. Hakomori & M. E. Powell 245

Small Molecules

Inaccuracies in measurement of conjugated and unconjugated bilirubin in bile with ethyl anthranilate diazo and solvent-partition methods.
By J. D. Ostrow & S. T. Boonyapisit 263

Enzymology

The nature of the allosteric interactions of ribonuclease and its ligands.
By E. J. Walker, G. B. Ralston & I. G. Darvey 1

Preparation of allosteric ribonuclease.
By E. J. Walker, G. B. Ralston & I. G. Darvey 5

The reaction of *Pseudomonas aeruginosa* cytochrome *c*-551 oxidase with oxygen.
By C. Greenwood, D. Barber, S. R. Parr, E. Antonini, M. Brunori & A. Colosimo 11

PAGE

Purification and properties of glutamate synthase and glutamate dehydrogenase from *Bacillus megaterium*.
By I. A. Hemmilä & P. I. Mäntsälä 45

Inactivation of glutamate dehydrogenase and glutamate synthase from *Bacillus megaterium* by phenylglyoxal, butane-2,3-dione and pyridoxal 5′-phosphate.
By I. A. Hemmilä and P. I. Mäntsälä 53

Studies on the time course and rate-limiting steps in the activation of adenylate cyclase in rat liver by cholera toxin.
By J. Fischer, T. R. Kohler, L. G. Lipson, J. Flores, P. A. Witkum & G. W. G. Sharp 59

Binding of ligands and spectral shifts in cytochrome *c* oxidase.
By P. Nicholls & V. Hildebrandt 65

Properties of matrix-bound dimer and monomer derivatives of immobilized creatine kinase from rabbit skeletal muscle.
By G. F. Bickerstaff & N. C. Price 85

Purification and immunochemical characterization of malate synthase from *Euglena gracilis*.
By E. Woodcock & M. J. Merrett 95

Isolation and characterization of isocitrate lyase from a thermophilic *Bacillus* sp.
By R. M. Chell, T. K. Sundaram & A. E. Wilkinson 165

The role of zinc in the stabilization of the dimeric form of bacterial α-amylase.
By R. Tellam, D. J. Winzor & L. W. Nichol 185

Proline biosynthesis by cell-free extracts of *Escherichia coli* and potential errors arising from the use of a bioradiological assay procedure.
By D. J. Hayzer & V. Moses 207

PAGE

The enzymes of proline biosynthesis in *Escherichia coli*. The molecular weights and the problem of enzyme aggregation.
By D. J. Hayzer & V. Moses 219

Inactivation and modification of lactate oxidase with fluorodinitrobenzene.
By Y. S. Choong, M. G. Shepherd & P. A. Sullivan 255

pH-dependent changes of intrinsic fluorescence of chemically modified liver alcohol dehydrogenases.
By D. M. Parker, M. J. Hardman, B. V. Plapp, J. J. Holbrook & J. D. Shore 269

Electron-paramagnetic-resonance studies on nitrogenase of *Klebsiella pneumoniae*. Evidence for acetylene– and ethylene–nitrogenase transient complexes.
By D. J. Lowe, R. R. Eady & R. N. F. Thorneley 277

The inactivation of native enzymes by a neutral proteinase from rat intestinal muscle.
By R. J. Beynon & J. Kay 291

Kinetics and mechanism of the rat brain phenol sulphotransferase reaction.
By E. J. M. Pennings, R. Vrielink & G. M. J. Van Kempen 299

Intermolecular Organization

Preparation of chromatin containing ribosomal deoxyribonucleic acid from the macronucleus of *Tetrahymena pyriformis*.
By R. W. Jones 145

Histone composition of a chromatin fraction containing ribosomal deoxyribonucleic acid isolated from the macronucleus of *Tetrahymena pyriformis*.
By R. W. Jones 155

RAPID PAPERS

PAGE

Proteins

Blood-group-I activity associated with band 3, the major intrinsic membrane protein of human erythrocytes.
By R. A. Childs, T. Feizi, M. Fukuda & S.-I. Hakomori 333

Solubilization of bovine heart-valve collagen.
By S. A. Jimenez & R. I. Bashey 337

Heparin–Sepharose 4B at low temperatures retains ribosomes.
By J. Hradec & O. Kříž 349

PAGE

Enzymology

Diffusional increase and decrease in half-maximal-activity substrate concentrations with two-substrate enzymic reactions.
By J.-M. Engasser & P. Hisland 341

A spectrophotometric method for the detection of contaminant chymopapains in preparations of papain. Selective modification of one type of thiol group in the chymopapains by a two-protonic-state reagent.
By B. S. Baines & K. Brocklehurst 345

Proteins

Amino acid sequences of α-helical segments from *S*-carboxymethylkerateine-A. Tryptic and chymotryptic peptides from a type-II segment.
By D. McC. Hogg, L. M. Dowling & W. G. Crewther 353

Amino acid sequences of α-helical segments from *S*-carboxymethylkerateine-A. Complete sequence of a type-II segment.
By W. G. Crewther, A. S. Inglis & N. M. McKern 365

Amino acid sequences of α-helical segments from *S*-carboxymethylkerateine-A. Complete sequence of a type-I segment.
By K. H. Gough, A. S. Inglis & W. G. Crewther 373

Amino acid sequences of α-helical segments from *S*-carboxymethylkerateine-A. Statistical analysis.
By T. C. Elleman, W. G. Crewther & J. Van Der Touw 387

Primary structures of cysteine-containing peptides from the calcium ion-transporting adenosine triphosphatase of rabbit sarcoplasmic reticulum.
By G. Allen & N. M. Green 393

Oxidation–reduction studies of the Mo–(2Fe–2S) protein from *Desulfovibrio gigas*.
By J. J. G. Moura, A. V. Xavier, R. Cammack, D. O. Hall, M. Bruschi & J. Le Gall 419

Characterization of a region of the primary sequence of troponin C involved in calcium ion-dependent interaction with troponin I.
By R. A. Weeks & S. V. Perry 449

The amino acid sequence of ferredoxin from the red alga *Porphyra umbilicalis*.
By I. Takruri, B. G. Haslett, D. Boulter, P. W. Andrew & L. J. Rogers 459

Studies on the tissue specificity of the high-mobility-group non-histone chromosomal proteins from calf.
By A. Rabbani, G. H. Goodwin & E. W. Johns 497

The isolation and partial characterization of the serum lipoproteins and apolipoproteins of the rainbow trout.
By E. R. Skinner & A. Rogie 507

PAGE

The iron-binding properties of hen ovotransferrin.
By J. Williams, R. W. Evans & K. Moreton 533

Appendix: Derivation of equations relating the fractional saturation of *N*-terminal and *C*-terminal sites to the number of bound iron atoms per molecule of ovotransferrin.
By J. G. C. Milne 541

Studies of the binding of different iron donors to human serum transferrin and isolation of iron-binding fragments from the *N*- and *C*-terminal regions of the protein.
By R. W. Evans & J. Williams 543

The isolation and characterization of the high-molecular-weight glycoprotein from pig colonic mucus.
By T. Marshall & A. Allen 569

Crystal structures of egg-white lysozyme of hen in acetate-free medium and of lysozyme complexes with *N*-acetylglucosamine and β-methyl *N*-acetylglucosaminide.
By S. J. Perkins, L. N. Johnson, P. A. Machin & D. C. Phillips 607

A structural model for desmosine cross-linked peptides.
By R. P. Mecham & J. A. Foster 617

Incorporation of [^{3}H]leucine into an actin-like protein in response to 1,25-dihydroxycholecalciferol in chick intestinal brush borders.
By P. W. Wilson & D. E. M. Lawson 627

Separation and partial characterization of guinea-pig caseins.
By R. K. Craig, D. McIlreavy & R. L. Hall 633

Purification and properties of retinoic acid-binding protein from chick-embryo skin.
By B. P. Sani & C. K. Banerjee 643

Identification of histidine-122α in human haemoglobin as one of the unknown alkaline Bohr groups by hydrogen–tritium exchange.
By K. Nishikura 651

Nucleic Acids

Evidence on the conformation of HeLa-cell 5.8S ribosomal ribonucleic acid from the reaction of specific cytidine residues with sodium bisulphite.
By J. M. Kelly, J. P. Goddard & B. E. H. Maden 521

PAGE

Lipids

Comparative study of the glycosphingolipids of chicken bursa of Fabricius and of chicken, rat and human thymus.
By R. Narasimhan & R. K. Murray 475

Carbohydrates

Hyaluronic acid in the pulmonary secretions of patients with asthma.
By S. Sahu & W. S. Lynn 565

Small Molecules

Influence of the peptide-chain length on disulphide-bond formation in neurohypophysial hormones and analogues.
By G. Moore 403

Magnetic-circular-dichroism studies of haem *a* and its derivatives.
By T. Brittain, C. Greenwood, J. P. Springall & A. J. Thomson 411

Enzymology

Purification and properties of γ-glutamylcyclotransferase from human erythrocytes.
By P. G. Board, K. A. L. Moore & J. E. Smith 427

Secretion of β-*N*-acetylglucosaminidase isoenzymes by normal human fibroblasts.
By P. Willcox 433

Evidence for an essential arginine-recognition site on adenosine 3′:5′-cyclic monophosphate-dependent protein kinase of rabbit skeletal muscle.
By M. Matsuo, C.-H. Huang & L. C. Huang 441

A kinetic study of ribulose bisphosphate carboxylase from the photosynthetic bacterium *Rhodospirillum rubrum*.
By J. T. Christeller & W. A. Laing 467

PAGE

Kinetic and mechanistic studies of methylated liver alcohol dehydrogenase.
By C. S. Tsai 483

Purification of rat intestinal maltase/glucoamylase and its anomalous dissociation either by heat or by low pH.
By P. R. Flanagan & G. G. Forstner 553

rac-Glycerol 1:2-cyclic phosphate 2-phosphodiesterase, a new soluble phosphodiesterase of mammalian tissues.
By N. Clarke & R. M. C. Dawson 579

The selective retardation of $NADP^+$-dependent dehydrogenases by immobilized Procion Red HE-3B.
By D. H. Watson, M. J. Harvey & P. D. G. Dean 591

Malate dehydrogenase of the cytosol. Ionizations of the enzyme–reduced-coenzyme complex and a comparison with lactate dehydrogenase.
By A. Lodola, D. M. Parker, R. Jeck & J. J. Holbrook 597

Regulation of pig heart pyruvate dehydrogenase by phosphorylation. Studies on the subunit and phosphorylation stoicheiometries.
By P. H. Sugden & P. J. Randle 659

Conversion of inactive (phosphorylated) pyruvate dehydrogenase complex into active complex by the phosphate reaction in heart mitochondria is inhibited by alloxan-diabetes or starvation in the rat.
By N. J. Hutson, A. L. Kerbey, P. J. Randle & P. H. Sugden 669

The oxidation of *Pseudomonas* cytochrome *c*-551 oxidase by potassium ferricyanide.
By D. Barber, S. R. Parr & C. Greenwood 681

RAPID PAPERS

PAGE

Lipids

Occurrence of glycosphingolipids in chicken egg yolk.
By S.-C. Li, J.-L. Chien, C. C. Wan & Y.-T. Li 697

Small Molecules

The direct determination of porphyrin carboxylic acids. High-pressure liquid chromatography with solvent systems containing phase-transfer agents.
By R. Bonnett, A. A. Charalambides, K. Jones, I. A. Magnus & R. J. Ridge 693

PAGE

Enzymology

Half-sites oxidation of bovine liver uridine diphosphate glucose dehydrogenase.
By J. S. Franzen, P. Marchetti, R. Ishman, J. Ashcom & D. S. Feingold 701

Contents of Volume 173, No. 3

FULL PAPERS

PAGE

Proteins

Comparative studies on intrinsic factor and cobalophilin in different parts of the gastrointestinal tract of the pig.
By G. Marcoullis, H. Merivuori & R. Gräsbeck 705

The role of nitro groups in the binding of nitroaromatics to protein MOPC 315.
By P. Gettins, D. Givol & R. A. Dwek 713

Protein thiolation and reversible protein–protein conjugation. *N*-Succinimidyl 3-(2-pyridyldithio)propionate, a new heterobifunctional reagent.
By J. Carlsson, H. Drevin & R. Axén 723

Structure and enzymic activity of ribonuclease-A esterified at glutamic acid-49 and aspartic acid-53.
By A. S. Acharya, B. N. Manjula & P. J. Vithayathil 821

Elastin cross-linking *in vitro*. Studies on factors influencing the formation of desmosines by lysyl oxidase action on tropoelastin.
By A. S. Narayanan, R. C. Page, F. Kuzan & C. G. Cooper 857

Amino acid sequence of the *N*-terminal 108 amino acid residues of the B chain of subcomponent C1q of the first component of human complement.
By K. B. M. Reid & E. O. P. Thompson 863

Effect of heparin on thrombin inactivation by antithrombin-III.
By R. Machovich & P. Arányi 869

Immunochemical characterization of casein from rabbit mammary gland.
By K. Al-Sarraj, D. A. White & R. J. Mayer 877

Characterization of pepsin-solubilized bovine heart-valve collagen.
By R. I. Bashey, H. M. Bashey & S. A. Jimenez 885

Removal of transamination and scission of residues from the peptide representing the copper-transport site of serum albumin.
By B. Sarkar, H. B. F. Dixon & D. Webster 895

Protein and lipid components of the pigeon erythrocyte membrane.
By C. Watts & K. P. Wheeler 899

PAGE

Molecular weight and subunit size of rabbit mammary-gland fatty acid synthetase.
By I. Grunnet & J. Knudsen 929

Structural studies on the glycoproteins from bovine cervical mucus.
By G. P. Roberts 941

Properties of human tissue isoferritins.
By M. Wagstaff, M. Worwood & A. Jacobs 969

Nucleic Acids

Formation and subsequent removal of O^6-methylguanine from deoxyribonucleic acid in rat liver and kidney after small doses of dimethylnitrosamine.
By A. E. Pegg & G. Hui 739

Carbohydrates

Interactions between different corneal proteoglycans.
By P. Speziale, M. S. Speziale, L. Galligani & C. Balduini 935

Enzymology

Substrate specificity and properties of uridine diphosphate glucuronyltransferase purified to apparent homogeneity from phenobarbital-treated rat liver.
By B. Burchell 749

Purification and properties of succinyl-coenzyme A–3-oxo acid coenzyme A-transferase from sheep kidney.
By J. A. Sharp & M. R. Edwards 759

Isolation of human lactate dehydrogenase isoenzyme X by affinity chromatography.
By A. H. J. Kolk, L. van Kuyk & B. Boettcher 767

Rapid purification and properties of potassium-activated aldehyde dehydrogenase from *Saccharomyces cerevisiae*.
By K. A. Bostian & G. F. Betts 773

Kinetics and reaction mechanism of potassium-activated aldehyde dehydrogenase from *Saccharomyces cerevisiae*.
By K. A. Bostian & G. F. Betts 787

PAGE

The mechanism of reaction of fully reduced membrane-bound cytochrome oxidase with oxygen at 176K.
By G. M. Clore & E. M. Chance 799

The mechanism of reaction of ferricyanide-pretreated mixed-valence-state membrane-bound cytochrome oxidase with oxygen at 173K.
By G. M. Clore & E. M. Chance 811

Electron-paramagnetic-resonance studies on the redox properties of the molybdenum–iron protein of nitrogenase between +50 and −450 mV.
By M. J. O'Donnell & B. E. Smith 831

The oxygenation of [3-*methyl*-^{3}H]desacetoxycephalosporin C [7β-(5-D-aminoadipamido)-3-methylceph-3-em-4-carboxylic acid] to [3-*hydroxymethyl*-^{3}H]desacetylcephalosporin C by 2-oxoglutarate-linked dioxygenases from *Acremonium chrysogenum* and *Streptomyces clavuligerus*.
By M. K. Turner, J. E. Farthing & S. J. Brewer 839

The interaction of purified acetylcholinesterase from pig brain with liposomes.
By C. A. Reavill, M. S. Wooster & D. T. Plummer 851

PAGE

Solubilization of bovine corpus-luteum adenylate cyclase in Lubrol-PX, Triton X-100 or digitonin and the stabilizing effect of sodium fluoride present in the solubilization medium.
By J. L. Young & D. A. Stansfield 919

Some properties of 3-hydroxy-3-methylglutaryl-coenzyme A synthase from ox liver.
By M. A. Page & P. K. Tubbs 925

Proteoglycan-degrading enzymes of rabbit fibroblasts and granulocytes.
By Z. Werb, J. T. Dingle, J. J. Reynolds & A. J. Barrett 949

Use of the sulphite adduct of nicotinamide–adenine dinucleotide to study ionizations and the kinetics of lactate dehydrogenase and malate dehydrogenase.
By D. M. Parker, A. Lodola & J. J. Holbrook 959

Intermolecular Organization

Solubilization of isolated central-nervous-system myelin preparations by the anionic detergent sodium dodecyl sulphate.
By A. J. Crang & M. G. Rumsby 90

RAPID PAPERS

PAGE

Proteins

The effects of Triton WR1339 and asialo-fetuin on the hepatic uptake of circulating native and asialo-carcinoembryonic antigen.
By P. Thomas & M. Jones 981

Haem degradation in abnormal haemoglobins.
By S. B. Brown & J. C. Docherty 985

Proteins from sciatic-nerve myelin in quaking and jimpy mice.
By J.-M. Matthieu 989

Small Molecules

Biochemical applications of chemically induced nuclear polarization in phenols, peptides, catecholamines and related molecules.
By K. A. Muszkat, M. Weinstein & C. Gilon 993

PAG

Enzymology

A difference in the specificities of human liver *N*-acetyl-β-hexosaminidases A and B detected by their activities towards glycosaminoglycan oligosaccharides.
By T. M. Bearpark & J. L. Stirling 99

The nitrogenase system of *Spirillum lipoferum*.
By P. W. Ludden, Y. Okon & R. H. Burris 100

General Methods

A general method for purification of deoxycytidine kinase.
By A. Baxter, L. M. Currie & J. P. Durham 100
